Research Statement: I am currently a PhD Candidate at the University of Illinois Urbana-Champaign advised by Professor Jimeng Sun. My areas of focus include Natural Language Processing, Sequential Event Data, and Machine Learning for Healthcare in general. I am also broadly interested in less-than-supervised ML and memory-augmented ML.

EDUCATION

PhD in Computer Science

University of Illinois Urbana-Champaign

August 2022 – 2026

Urbana, Illinois

- PhD Candidate advised by Professor Jimeng Sun (GPA 4.0). Working in Natural Language Processing, Machine Learning for Healthcare, Clinical Trial Outcome Extraction
- Relevant Courses – Advanced NLP, Text Mining, Deep Learning for Healthcare, Advanced Information Retrieval

Masters of Science in Robotics

Carnegie Mellon University

August 2020 – August 2022

Pittsburgh, PA

- School of Computer Science, Research Masters Advised by Professor Artur Dubrawski (GPA: 3.9), Thesis: Addressing Time-series Signal Quality in Healthcare Data
- Relevant Courses - Math Fundamentals for Robotics, Computer Vision, Probabilistic Graphical Models, Machine Learning, Convex optimization

Bachelor of Science in Computer Science and Mathematical Statistics

Purdue University

August 2016 – May 2019

West Lafayette, IN

- **With Honors and Distinction** (GPA: 3.9)
- Relevant Courses (* indicates graduate level) – Machine Learning*, Algorithms*, AI*, Graphical Models, Data Structures and Algorithms, Advanced Linear Algebra, Differential Equations, Real Analysis, Probability*, Statistical Theory*

WORK EXPERIENCE

Research Intern

Medidata Solutions (Dassault Systmes)

May 2023 – August 2023

New York City, NY

- Summer Research Project: TrialSynth: Sequential Patient Event Synthesis For Clinical Trials (In Submission). Collaborated on existing research that resulted in an ICML best workshop paper

Research Associate

Carnegie Mellon University Robotics Institute

August 2019 – August 2022

Pittsburgh, PA

- Conducted various research projects in partnership with the AutonLab and University of Pittsburgh Medical Center (Advised by Professor [Artur Dubrawski](#)). Published 1 accepted paper in Neurips (ML4H) Workshop, 2 accepted student abstracts in AAAI Student Track, 1 accepted paper in AAAI Symposium–Artificial Intelligence for Predictive Maintenance, 2 medical abstracts in American Thoracic Society

Robotics Institute Summer Scholar (RISS)

Carnegie Mellon University Robotics Institute

June 2019 – August 2019

Pittsburgh, PA

- [Robotics Institute Summer Scholar \(RISS\) program](#) (2-3% acceptance rate) - Investigated methods into detecting physiological state changes via deep unsupervised learning mentored by Professor [Artur Dubrawski](#). Created a custom Pytorch implementation of dilated CNNs for sequence embedding and autoencoders with attention and Resulted in acceptance to NeurIPS ML4H workshop as well as a staff research position

NSF REU Undergraduate Researcher

DePaul University College of Computing and Digital Media

June 2018 – August 2018

Chicago, IL

- [Medix REU Program](#) (<10% acceptance rate) - Implemented a custom 3D Generative Adversarial Networks and 3D CNN to improve performance of Computer-Aided Detection systems under [Professor Jacob Furst](#) and [Professor Daniela Raicu](#). Resulted in oral presentation and publication of *Augmenting LIDC dataset using 3D generative adversarial networks to improve lung nodule detection* in SPIE Medical Imaging conference

TEACHING AND MENTORSHIP

Teaching Assistant for CS598 Deep Learning for Healthcare

January 2024 – May 2024

University of Illinois Urbana-Champaign

Urbana, IL

- Created, graded, and reviewed labs, projects, and tests. Top answerer on Piazza.

Veritas AI Mentor

Spring 2022

Veritas AI

Remote

- Lead and mentored multiple groups of high school students over a 10-week time period to learn machine learning and classify CIFAR-10 images using a CNN. Github Link.

AI4ALL Mentor

Summer 2021

Carnegie Mellon University

Pittsburgh, PA

- Advised 5 high school students one-on-one over a 2-week time period to use transfer learning and DenseNet to achieve over 90% accuracy in plant disease classification. Created and optimized project template code to fit Google Collab memory requirements.

HONORS AND AWARDS

Scholarships and Academic Awards

- Boeing Scholarship - disbursed based on academic merit in CS. 5/1900 CS students at Purdue.
- Purdue Presidential Scholarship - disbursed based on high academic achievement; leadership and service in school/community. 830/40,000 students at Purdue.
- Gordan L. Walker Scholarship - disbursed based on continuing academic achievement in mathematics. 1 out of all Math students at Purdue.
- Purdue West Lafayette Deans List (all years), Honors College Member (all years).

DJI Drone Challenge

Summer 2019

- Led a team of 5 in a drone challenge following a path specified by aruco tags autonomously. Implemented functionality of viewing AR holographic images through the drone camera. Created an Android app to switch between drone modes. 1st place out of 8 teams and 40 competitors

UBTech Humanoid Challenge

Summer 2019

- Led a team of 6 in programming and teleoperating a humanoid robot in ROSpy with a Raspberry Pi that could effectively grasp and move a small object. 1st place out of 6 teams and 40 competitors.

ADDITIONAL PROJECTS AND SERVICE

Committees

- Carnegie Mellon University Robotics Institute Summer Scholars (RISS) Admissions Committee (2020-2022): Reviewed applicants on quality of fit to RISS. Produced forms and documentation used to streamline the application process.
- Sunstella Summer Camp 2023: Mentored 3 participants in ML projects, one of which went on to become a PhD Student at UIUC

Reviewer Duties

- ICLR 2022, 2024
- ACM KDD 2024
- NeurIPS 2019-2021
- ACM CHIL 2020
